

Why not get creative and enter the British Science Association's annual poster competition?

You can make your poster about whatever version of this year's theme **'Innovating for the Future'** that you would like.

Inspiration can come from anywhere - innovation in technology or health care, or maybe even innovation that is used in STEM careers!

Use your **aspiration** value to plan a creative idea, product or way of doing things that will solve a problem.

Posters can be made by hand or using a computer. They aren't able to accept digitally animated posters but static graphics are welcome!

Please do not submit your entries online but instead bring them to school FAO Mrs Stevens or email them to [office@weltonprimaryschool.co.uk](mailto:office@weltonprimaryschool.co.uk).

Staff will choose the top 5 entries to be submitted to the official British Science Week competition on behalf of our school- these children will also win a small prize. All entries will receive a certificate from us at Welton and be celebrated within school. Entries should be shared with us at Welton by Monday 19<sup>th</sup> April - so you have the Easter holidays to complete this challenge if you wish.

Here are some ideas based on last year's entries (please note the theme was different):

<https://www.britishscienceweek.org/poster-competition-2020-winners-announced/>

This was the Early Years winner.

Before entering your poster at school please check that you agree with the terms and conditions on the competition website:

<https://www.britishscienceweek.org/plan-your-activities/poster-competition/>

If you don't fancy entering the competition and would just like to take part in some fun science at home this link will take you to some 'Fun Family Science':
